P VALUE	0.09630968326	

We do not reject the null hypothesis because the p-value = 0.096 is greater than α = 0.05. Therefore, at the 5% significance level, we cannot conclude that the Growth fund is riskier than the Value fund.

As before, the p-value for a two-tailed test can be found by multiplying the right-tailed probability by two.
